

REMARKS:

Examiner Kwiecinski is thanked for the indication that claims 1-12 and 38-70 would be allowable once the double-patenting rejection has been overcome.

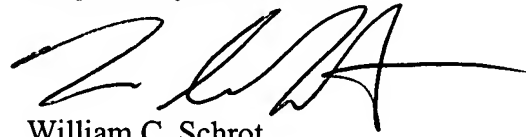

Accordingly, Applicants submits herewith a Terminal Disclaimer disclaiming the terminal part of the statutory part of any patent granted on the instant application which would extend beyond the expiration date of the full statutory term of U.S. Patent No. 6,988,342.

With respect to the objection to the drawings, Applicants request that the application be amended to include new Figure 2A, which shows substantially cylindrical spaced depressions. New Figure 2A is attached hereto. In addition, Applicant requests that the specification be amended to include reference to new Figure 2A.

Support for Figure 2A is provided in the originally filed specification at page 8, lines 21-22, which specifically provides that the depressions 24 may also have a cylindrical configuration. Note that the originally filed specification also provides that the tonal areas 40 of plate P, which correspond to tonal portions 20, may include a plurality of cylindrically-shaped protrusions. See page 11, lines 9-15. Therefore, Applicants submit that no new matter is being added by the addition of Figure 2A.

The fee for the Terminal Disclaimer is attached. It is believed that no other fees are due with this submission. Should that determination be incorrect, then please debit Account 50-0548 and notify the undersigned.

Respectfully submitted,

A handwritten signature in black ink, appearing to read 'W. Schrot', with a long horizontal flourish extending to the right.

William C. Schrot

Reg. No. 48,447
